Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Lazaris et al.

There is disclosed in Lazaris a beverage preparation machine, comprising: a first piercing element 42 for forming an inlet, in use, in a cartridge; and a second piercing element 44 for forming an outlet in the cartridge; wherein the first and second piercing elements are formed as a single removable unit 40.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lazaris et al. in view of Fischer '519.

Fischer discloses in a beverage preparation machine, the use of a fixed lower part 2, upper rotatable part 1, and inlet and outlet piercing elements.

It would have been obvious to one skilled in the art to provide the machine of Lazaris with the fixed lower part and rotatable upper part disclosed in Fischer, in order

Art Unit: 1761

to provide an alternative arrangement for securing a cartridge for injection of heated liquid.

In regards to claim 4, the use of plastic to construct the piercing elements is an obvious matter of design choice, since applicant has not disclosed that the use of plastic solves any stated problem or is for any particular purpose and it appears that the invention would perform equally well with that disclosed in the prior art.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Weinert and Miller et al. are cited for their disclosure of piercing elements mounted to a common member.
